**Vigor App:** A workout application that contains many advantages of Laravel as:

- Queues.
- Custom commands.
- Schedule.
- Sending Emails.
- Firebase Cloud Message (FCM) for sending notification.
- Traits.
- Jobs to Improve app performance.
- Events to send Realtime messages from Backend.
- Laravel WebSocket.
- Passport for AuthO2 authentication.

And many more features, you can find more about the application via the **link:** [Vigor App on LinkedIn](#)

This project use Laravel & MySQL for Backend and Flutter for Frontend [GitHub Link](#).

**Blind Care Association:** A project that aims to automate the management process of the Blind Care Association in Damascus, including the processes of registering users, managing and distributing aid, and aid requests.

Project was delivered in Nov, 2023.

**Red Swap Blue:** A search algorithms game that implement BFS, DFS, Uniform Cost Search and A\* algorithms.

This project was done using HTML, CSS and JavaScript [Link](#).

## Other Skills :

- Very good knowledge with HTML5, CSS3 and JavaScript (ES6).  
Some of my work:
  - [Kasper Template](#)
  - [Clipboard landing page](#)
  - [Sunnyside Agency Landing Page](#)
  - [Fylo Landing Page](#)
  - You can find more of my HTML, CSS & JavaScript work on :  
Link : <https://www.frontendmentor.io/profile/Philip-Droubi>
- Good knowledge in UI/UX.
