 - Portfolio : https://philip-droubi.github.io/Philip_Droubi_portfolio

Education:

Graduated from the Faculty of Informatics, Damascus University.

2019 – 2024.

Skills:

- Three years of experience in Laravel PHP framework.
- Ability to work with SQL and MySQL Databases.
- Ability to create functional APIs test and docs it with Postman.
- Integration with third-party services like Firebase and Stripe.
- Version control (Git, GitHub, and GitLab).
- Knowledge of SDLC principles, Agile Methodologies, and Design Patterns.
- Good experience in systems analysis and creating engineering diagrams such as ERD, use-case diagrams, activity diagrams, etc.
- Clean Code Architecture.
- Problem Solving.
- Teamwork, Fast learning, and adapting.

Language:

Arabic: native language.

English: good at speaking, reading, and writing.

My Experience:

Freelancer (2023 - Present): I have been working as a freelancer, developing backend applications using the Laravel framework since mid-2023.

Graduation Project: Freelancing Platform (2024): A Syrian freelancing platform that aims to improve collaboration between freelancers and stakeholders on freelancing projects.

I was responsible for system analysis and design, as well as backend development using the PHP Laravel framework. Additionally, I participated in the design and implementation of a user-friendly website using React.js.

This project was conducted in collaboration with [Peak Link](#) IT Company, providing valuable real-world experience in the IT industry.

Blind Care Association (2023): A project that aims to automate the management process of the Blind Care Association in Damascus, including user registration, managing, and distributing aid and aid requests. The project was delivered in November 2023.

Read more about the project features: [System Requirements \(AR\)](#).

Recommendation letter from Blind Care Association In Damascus: [Google Drive](#).

Vigor App (2022): A workout application that contains many advantages of Laravel as:

- Queues.
- Custom commands.
- Schedule.
- Sending Emails.
- Firebase Cloud Message (FCM) for sending notifications.
- Traits.
- Jobs to improve app performance.
- Events to send real-time messages from the Backend.
- Laravel WebSocket.
- Passport for AuthO2 authentication.

And many more features, you can find more about the application via this **link**: [Vigor App on LinkedIn](#).

This project uses Laravel & MySQL for the Backend and Flutter for the Frontend [GitHub Link](#).

Red Swap Blue (2022): An algorithm-based game implementing BFS, DFS, Uniform Cost Search, and A* algorithms using HTML, CSS, and JavaScript [GitHub Link](#).

Shopy (2021): An e-commerce application done with the basic usage of Laravel PHP framework:

It uses Laravel & MySQL as the Backend and Flutter as the Frontend [GitHub Link](#).

Other Skills:

- Very good knowledge of building responsive web applications using HTML5, CSS3, Tailwind, JavaScript (ES6), and TypeScript.

You can find more of my HTML, CSS, and JavaScript work on Frontend Mentor:

Link: <https://www.frontendmentor.io/profile/Philip-Droubi>

- Some experience with React.js.
- Good knowledge of UI/UX.
